PHYSICIANS AND SURGEONS

The Physicians, Surgeons and Specialists listed in this Roster are considered in accordance with the standard recognized where they practice their profession.

These selections are based on the consensus of opinions of the medical profession. Frequently professors of medical colleges are consulted who make recommendations and suggestions. Membership is also obtainable by direct application or recommendation by listees. These applications and recommendations are included when sufficient endorsement has been received and qualifications verified. Applications of these men are usually under consideration two or more years. Their competence, ability and professional conduct must at all times be above reproach. Their canons of ethics must be in keeping with national, state and local associations. They are those who recognize their debt to the profession and the public.

Those who are listed as Specialists have had additional training in their particular field of endeavor and are competent and qualified.

The purpose is to keep before the profession a list of Physicians and Surgeons in accordance with the established standards of ethics and competency, whose ability cannot be questioned. The aim is to list only men of high professional ideals, whose character and training places them among the pre-eminent in the community where they practice.

The use of this Roster will protect patients from the incompetent, unscrupulous and the advertiser.

There are many physicians who by their qualifications, attainments and character are entitled to be included in this Roster but who are omitted because they have not made application; by oversight have not been recommended; or sufficient endorsement regarding them has not been received.

Reports regarding violations of the canons of ethics by listees would be of great help to this Roster.

The many users of this list extend their appreciation to those who have volunteered commendations, suggestions and constructive criticisms.

The Publishers wish to acknowledge their grateful appreciation of the generous co-operation offered by the leading Physicians and Surgeons, Hospitals, Medical Schools and Medical Societies in the preparation of this Roster.

Note—The star (*) before names indicates that these men have served in the Spanish-American or World War.

DENTISTS

This is the oldest conservative Roster of Dentists published. The aim is to include in this list of Dentists and Dental Specialists, practitioners who are competent in the art and technique of Dentistry and who recognize their debt to the public.

The Dentists included in this Roster are classified in accordance with the standard recognized in the respective localities where they practice their profession. Their competence, ability and professional conduct must at all times be above reproach. Their canons of ethics must be in keeping with national, state and local associations. They are those who recognize their debt to the profession and the public.

Those who are listed as Specialists have had additional training in their particular field of endeavor and are competent and qualified.

These selections are based on the consensus of opinions of the Dental profession. Frequently professors of Dental Schools make recommendations and suggestions. Membership is obtainable by either direct application or recommendation by the listees. Any ethical Dentist may become a member when sufficient endorsement has been received and qualifications verified. The application is usually under consideration for two or more years.

The purpose is to keep before the Dental profession a reliable reference and also to protect their patients from the unscrupulous and the advertiser. This statement is not to be construed as a reflection against any ethical Dentist.

There are many Dentists who by their qualifications, attainments and character are entitled to be included in this Roster, but who are omitted because they have not made application; by oversight have not been recommended; or sufficient endorsement regarding them has not been received.

Reports regarding violations of the canons of ethics by listees would be of great help to this Roster.

The many users of this list extend their appreciation to those who have volunteered commendations, suggestions and constructive criticisms.

The Publishers wish to acknowledge their grateful appreciation of the generous co-operation offered by the Dental Profession, Dental Schools and Dental Societies in the preparation of this Roster.

Note—The star (*) before names indicates that these men have served in the Spanish-American or World War.
